Subject index*

A

Absorption, relative, of thermal energy in retina and choroid (Geeraets et al.), 340
spectra of isolated single frog retinal rods and cones. Visual pigments (Wolken), 327
Abstracts of papers presented at sectional meetings of Association for Research in Ophthalmology, 413, 792
AC/A ratio, accommodation, convergence, and effect of pupil size on (Ripps et al.), 127
Acceleration, positive, limitation of ocular motility and pupillary dilatation in human beings during (Duane, Beckman, and Coburn), 136
Accommodation, convergence, and AC/A ratio, effect of pupil size on (Ripps et al.), 127
and dynamics of steady-state intraocular pressure (Armaly and Jepson), 480
Accumulation of amino acids by calf lens (Kern), 368
Acetazolamide interrelations of blood-aqueous potential and, in rabbit (Miller), 363
Activation of corneal stromal cells to take up neutral red, effect of amino acid, purine, and pyrimidine analogues on (Weimar), 226
Adrenalin and noradrenalin, intrauterine, effects on fetal rat lens (Pitel and Lerman), 406
Age and cataract formation, glycoproteins of lens in relation to (Dische, Smirnow, and Zelmenis), 646
influence, on the ribonucleic acid of lens, (Dische, Zelmenis, and Larys), 101
Albert M. Potts (Johnson), 283
Albumin, equine, diffusion kinetics, in rabbit cornea (Sery, Pinkes, and Nagy), 756
reactions in cornea to, evaluation (Sery, Pinkes, and Nagy), 672
Alpha aminoisobutyric acid, transport of, into ocular fluids and lens (Reddy and Kinsey), 41
Alterations of the blood-aqueous potentials in the rabbit (Miller), 59
Amines, mast cells and, in normal ocular tissues (Levene), 531
Amino acid, purine, and pyrimidine analogues on activation of corneal stromal cells to take up neutral red, effect of (Weimar), 226
acids, accumulation, by calf lens (Kern), 368
free, and related compounds in growing rat lens, quantitative analysis (Reddy and Kinsey), 635
transport, into posterior chamber of rabbit eye (Kinsey and Reddy), 355
Analysis, quantitative, of free amino acids and related compounds in growing rat lens (Reddy and Kinsey), 635
Anhydrase, carbonic, inhibitions and plasma levels, studies of effect (Constant), 609
Announcements, 149, 279, 436, 586, 701, 802
Antibodies, lens, and eye development (Langman and Maisel), 396
Antibody tests for ocular toxoplasmosis (Maloney and Kaufman), 556
Antiviral agents, specific, in herpes simplex keratitis, comparison of (Kaufman, Maloney, and Nesburn), 686
Aqueous flow, measurement of rate of, with iodide (Becker), 52
humor formation, pressure cup technique for measurement, evaluation (Langham), 484
Association for Research in Ophthalmology, abstracts of papers presented at sectional meetings, 413, 792
Award, Friedenwald Memorial, remarks on acceptance of (Potts), 288; (Bárány), 707

B

Bárány, E., publications, 708
BCG, attempts to produce experimental model with, in phlyctenulosis (Thygeson, Díaz-Bonnet, and Okumoto), 262
Blood-aqueous potential and acetazolamide in rabbit, interrelations (Miller), 363
in rabbit, alterations of (Miller), 59
Book reviews, 700
Bovine lens fibers, glucoproteins of (Dische, Smirnow, and Zelmenis), 646
retinal cells, continuous culture (Wolken and Ward), 693
Brain stimulation, extraocular muscle action from, in macaque (Jampel), 656

*February, pp. 1-150; April, pp. 151-280; June, pp. 281-436; August, pp. 437-586; October, pp. 587-702; December, pp. 703-816.

C

Carbohydrate metabolism of cornea, some aspects of (Kinoshita), 178
protein and, in rat lens, effect of ionizing radiation on (Lerman, Devi, and Banerjee), 95
Carbonic anhydrase inhibitors and plasma levels, studies of effect (Constant), 609
Carcinosarcoma, Walker 256, intra-arterial inoculation of tumor cells from, production of ocular and orbital neoplasms by (Basu, Sibay, and Chang), 745
Carrageenin granuloma of guinea pig cornea, effects of triethylenethiophosphoramide on (Burns and Beighle), 666
Cataract, diabetic, experimental, metabolic pathways in (Lerman), 507
formation, age and, glycoproteins of lens in relation to (Dische, Smirnow, and Zelmenis), 646
influence on ribonucleic acid of lens (Dische, Zelmenis, and Larys), 101
Cell, pigment, retinal epithelium: in vitro incorporation of P-32 and effect of diaminodiphenoxyalkane (Glocklin and Potts), 111
Cells, bovine retinal, continuous culture (Wolken and Ward), 693
mast, and amines in normal ocular tissues (Levene), 531
Müller's, "middle limiting membrane" of human retina and (Fine and Zimmerman), 304
from rabbit cornea and other tissues grown in vitro, karyologic studies on (Sarkar, Basu, and Miller), 33
Cercopithecus ethiops, outflow resistance in eye of, mode of action of pilocarpine on (Bárány), 712
Chick lens proteins, formation and distribution of (Langman and Maisel), 86
Choroid, malignant melanomas of, ultrastructure (Hogan and Feeney), 544
relative absorption of thermal energy in retina and (Geeraets et al.), 340
Choroidotoxic substances, retinotoxic and (Potts), 290
Ciliary muscle, human, fine structure (Ishikawa), 587
Clinical aspects of corneal homograft reaction (Maumenee), 244
usefulness of the Mackay-Marg tonometer, evaluation of the basic validity and (Moses, Marg, and Oechsli), 78
Concentration, ocular zinc (Galin, Nano, and Hall), 142
of phenothiazines in eye of experimental animals (Potts), 522
Cone, rod and, electroretinograms, resonant frequencies of (Gouras and Gunkel), 122
Contact lens, modified, for electroretinography (Tamler), 787
Convergence, accommodation, and AC/A ratio, effect of pupil size on (Ripps et al.), 127
Cornea, carbohydrate metabolism, some aspects of (Kinoshita), 178
fine structure, further observations on (Jakus), 202
guinea pig, carrageenin granuloma of, effects of triethylenethiophosphoramide on (Burns and Beighle), 666
living, metabolism and deturgescence, interrelationship (Langham), 187
rabbit, osmolality of interstitial fluid in, microcryoscopic determination (Brubaker and Kupfer), 653
movement of ions and water across (Donn), 170
rabbit, and other tissues grown in vitro, karyologic studies on cells from (Sarkar, Basu, and Miller), 33
Corneal grafts, some aspects of immunologic factors in (Halbert and Ehrlich), 233
homograft reaction, clinical aspects of (Maumenee), 244
hydration. Comparative physiology of fish and mammals. Proctor Award Lecture (Smelser), 11
and corneal transparency, some aspects of interrelation between (Potts), 163
factors influencing (Harris), 151
studied in stromal segments separated by interlamellar discs (Pollack), 661
rings, immune (Sery, Pinkes, and Nagy), 672
diffusion kinetics of equine albumin in rabbit cornea (Sery, Pinkes, and Nagy), 756
mechanism of local ring formation (Sery and Nagy), 762
stroma, swelling pressure of (Dohlman, Hedbys, and Mishima), 158
stromal cells to take up neutral red, effect of amino acid, purine, and pyrimidine analogues on activation of (Weimar), 226
transparency, some aspects of interrelation between corneal hydration and (Potts), 163
vascularization (Cogan), 253
Corneas, polysaccharides in normal and pathologic (Anseth and Laurent), 195
Cortisone, effects on pine pollen–induced uveitis in guinea pigs (Coleman and Canaan), 751

Crystalline lens, physical basis for transparency (Trokel), 493
studies on (Reddy and Kinsey), 635
Culture, continuous, of bovine retinal cells (Wolken and Ward), 693

D

Des Moines population study of glaucoma (Armaly), 618
Deturgescence and metabolism of living cornea, interrelationship (Langham), 187
Development, eye, lens, antibodies and (Langham and Maisel), 396
Diabetic cataract, experimental, metabolic pathways in (Lerman), 507
rat lens, glucose metabolism and fructose synthesis in (Kuck), 390
Diaminodiphenoxyalkane, effect, in vitro incorporation of P-32 in retinal pigment epithelium and (Glocklin and Potts), 111
Diffusion kinetics of equine albumin in rabbit cornea (Sery, Pinkes, and Nagy), 756
Dilatation, pupillary, limitation of ocular motility and, in human beings during positive acceleration (Duane, Beckman, and Coburn), 136
5,5-Dimethyl-2,4-oxazolidinedione (DMO), distribution (Constant), 609
Discs, interlamellar, corneal hydration studied in stromal segments separated by (Pollack), 661
Distribution of chick lens proteins, formation and (Langman and Maisel), 86
of rubidium-86 accumulated in rabbit lens (Becker and Cotlier), 642
DMO (5,5-dimethyl-2,4-oxazolidinedione), distribution (Constant), 609
Dynamics of steady-state intraocular pressure, accommodation and (Armaly and Jepson), 480

E

Editorial (Berens), 1
Electrodes, noncorneal, electroretinograms from (Tepas and Armington), 784
Electron microscopy, study of two cases of retinoblastoma by (Allen, Latta, and Straatsma), 728
Electroretinograms from noncorneal electrodes (Tepas and Armington), 784
rod and cone, resonant frequencies of (Gouras and Gunkel), 122
Electroretinography, modified contact lens for (Tamler), 787
Endocrine exophthalmos, relationship to sulfation of orbital tissues (Haddad), 773
absorption of (Geeraets et al.), 340
Energy, thermal, in retina and choroid, relative
Epithelium, retinal pigment, cell metabolism of (Glocklin and Potts), 111
Equine albumin, reactions in cornea to, evaluation (Sery, Pinkes, and Nagy), 672
ERG, human, spatial differences in (Gouras, Gunkel, and Jones), 333
Exophthalmos, endocrine, relationship to sulfation of orbital tissues (Haddad), 773
Experimental staphylococcic keratitis (Hogan et al.), 267
Extraocular muscle action from brain stimulation in the macaque (Jampel), 565
silicone rubber tendon for (Bowen and Dyer), 579
Eye development, lens antibodies and (Langman and Maisel), 396
of experimental animals, concentration of phenothiazines in (Potts), 522
rabbit, temperature gradients in (Schwartz and Feller), 513

F

Fetal rat lens, effects of intrauterine Adrenalin and noradrenalin on (Pitel and Lerman), 406
Fibers, bovine lens, glycoproteins of (Dische, Smirnow, and Zelmenis), 646
Fine structure of cornea, further observations on (Jakus), 202
of human ciliary muscle (Ishikawa), 587
Fish and mammals, comparative physiology of. Corneal hydration (Smelser), 11
Flow respirometer, measurement of oxygen consumption in rat lens with (Sippel), 377
Fluid, interstitial, in living rabbit cornea, osmolality of, microcryoscopic determination (Brubaker and Kupfer), 653
Fluids, ocular, and lens, transport of alpha aminoisobutyric acid into (Reddy and Kinsey), 41
Formation and distribution of chick lens proteins (Langman and Maisel), 86
Friedenwald Memorial Award, presentation to Ernst Bárány (Kinsey), 705
to Albert M. Potts (Johnson), 283
remarks on acceptance (Bárány), 707; (Potts), 288
Friedenwald Memorial Lecture. The mode of action of pilocarpine on outflow resistance in the eye of a primate (Cercopithecus ethiops) (Bárány), 712
Retinotoxic and choroidotoxic substances (Potts), 290
Fructose synthesis in diabetic rat lens, glucose metabolism and (Kuck), 390

G

Glaucoma, Des Moines population study (Armaly), 618
Glucose metabolism and fructose synthesis in diabetic rat lens (Kuck), 390
Glutaminase I, repression, in rat retina by administration of sodium-L-glutamate (Freedman and Potts), 118
Glutathione, respiration and, in growing rat lens (Sippel), 629
Glycoproteins of lens in relation to age and cataract formation; bovine lens fibers (Dische, Smirnow, and Zelmenis), 646
Gradients, temperature, in rabbit eye (Schwartz and Feller), 513
Grafts, corneal, some aspects of immunologic factors in (Halbert and Ehrlich), 233
Granuloma, carrageenin, of guinea pig cornea, effects of triethylenethiophosphoramide on (Burns and Beighle), 666
Growing rat lens, respiration and glutathione in (Sippel), 629
Guinea pig cornea, carrageenin granuloma of, effects of triethylenethiophosphoramide on (Burns and Beighle), 666

H

Herpes simplex keratitis (Kimura, Diaz-Bonnet, and Okumoto), 273
  experimental, therapy (Kaufman and Howard), 561
  specific antiviral agents in, comparison of (Kaufman, Maloney, and Nesburn), 686
Histopathology of experimentally increased intraocular pressure in rabbit (Kupfer), 474
Homograft reaction, corneal, clinical aspects (Maumenee), 244
Hormone, parathyroid, lenticular effects (Firschein), 788
Horopter, consideration of (Ogle), 446
Hydration, corneal. Comparative physiology of fish and mammals (Smelser), 11
  and corneal transparency, some aspects of interrelation between (Potts), 163
  factors influencing (Harris), 151
  studied in stromal segments separated by interlamellar discs (Pollack), 661

I

Immune corneal rings: diffusion kinetics of equine albumin in rabbit cornea (Sery, Pinkes, and Nagy), 756
  mechanism of local ring formation (Sery and Nagy), 762
Immune corneal rings—Cont'd
  reactions to equine albumin (Sery, Pinkes, and Nagy), 672
Immunologic factors in corneal grafts, some aspects of (Halbert and Ehrlich), 233
Influence of age and cataract formation on ribonucleic acid of lens. II. Changes in concentration and distribution of RNA in rabbit lenses during first year of life (Dische, Zelmenis, and Larys), 101
Inhibitors, carbonic anhydrase, and plasma levels, studies of effect (Constant), 609
Inoculation, intra-arterial, of tumor cells from Walker carcinosarcoma 256, production of ocular and orbital neoplasms by (Basu, Sibay, and Chang), 745
Interlamellar discs, corneal hydration studied in stromal segments separated by (Pollack), 661
Interstitial fluid in living rabbit cornea, osmolality of, microcryoscopic determination (Brubaker and Kupfer), 653
Intraocular pressure, experimentally increased, in rabbit, histopathology (Kupfer), 474
  steady-state dynamics of, accommodation and (Armaly and Jepson), 480
Iodide, measurement of rate of aqueous flow with (Becker), 52
Ionizing radiation, effect, on protein and carbohydrate metabolism in rat lens (Lerman, Devi, and Banerjee), 95
Ions and water, movement across cornea (Donn), 170

K

Karyologic studies on cells from rabbit cornea and other tissues grown in vitro (Sarkar, Basu, and Miller), 33
Keratitis, herpes simplex (Kimura, Diaz-Bonnet, and Okumoto), 273
  experimental, therapy (Kaufman and Howard), 561
  specific antiviral agents in, comparison (Kaufman, Maloney, and Nesburn), 686
  staphylococcic, experimental (Hogan et al.), 267
Kinetics, diffusion, of equine albumin in rabbit cornea (Sery, Pinkes, and Nagy), 756

L

Lens antibodies and eye development (Langman and Maisel), 396
  contact, modified, for electroretinography (Tamler), 787
  crystalline, physical basis for transparency (Trokel), 493
  studies on (Reddy and Kinsey), 635

Lens—Cont'd
diabetic rat, glucose metabolism and fructose synthesis in (Kuck), 390
fetal rat, effects of intrauterine Adrenalin and noradrenalin on (Pitel and Lerman), 406
fibers, bovine, glycoproteins of (Dische, Smirnow, and Zelmenis), 646
glycoproteins of, in relation to age and cataract formation (Dische, Smirnow, and Zelmenis), 646
growing rat, respiration and glutathione in (Sippel), 629
influence of age and cataract formation on ribonucleic acid of (Dische, Zelmenis, and Larys), 101
ocular fluids and, transport of alpha aminoisobutyric acid into (Reddy and Kinsey), 41
proteins, chick, formation and distribution (Langman and Maisel), 36
rabbit, accumulation of rubidium-86 by (Becker), 502
rubidium-86 accumulated in, distribution of (Becker and Cotlier), 642
rat, effect of ionizing radiation on protein and carbohydrate metabolism in (Lerman, Devi, and Banerjee), 95
oxygen consumption in, measurement, with flow respirometer (Sippel), 377
respiration, relationship of, to oxygen concentration and pH (Sippel), 385
Lenticular effects of parathyroid hormone (Firschein), 788
Levels, plasma, carbonic anhydrase inhibitors and, studies of effect (Constant), 609
Limitation of ocular motility and pupillary dilatation in human beings during positive acceleration (Duane, Beckman, and Coburn), 136

M

Macaque, extraocular muscle action from brain stimulation in (Jampel), 565
Mackay-Marg tonometer, evaluation of basic validity and clinical usefulness of (Moses, Marg, and Oechsli), 78
Malformations, ocular, of chick embryo, produced by photocoagulation (Jesberg), 348
Malignant melanomas of choroid, ultrastructure (Hogan and Feeney), 544
Mammals, fish and, comparative physiology of. Corneal hydration (Smelser), 11
Mast cells and amines in normal ocular tissues (Levene), 531
Measurement of rate of aqueous flow with iodide (Becker), 52
Melanomas, malignant, of choroid, ultrastructure (Hogan and Feeney), 544
Metabolic pathways in experimental diabetic cataract (Lerman), 507
Metabolism of cornea, carbohydrate, some aspects of (Kinoshita), 178
and deturgescence of living cornea, interrelationship of (Langham), 187
glucose, and fructose synthesis in diabetic rat lens (Kuck), 390
proteins and carbohydrate, in rat lens, effect of ionizing radiation on (Lerman, Devi, and Banerjee), 95
of retinal pigment cell epithelium: in vitro incorporation of P-32 and effect of diaminodiphenoxyalkane (Glocklin and Potts), 111
Microcryoscopic determination of osmolality of interstitial fluid in living rabbit cornea (Brubaker and Kupfer), 653
"Middle limiting membrane" of human retina, Müller's cells and (Fine and Zimmerman), 304
Movement of ions and water across cornea (Donn), 170
Müller's cells and "middle limiting membrane" of human retina (Fine and Zimmerman), 304
Muscle, ciliary, human, fine structure (Ishikawa), 587
extraocular, action from brain stimulation in the macaque (Jampel), 565
silicone rubber tendon for (Bowen and Dyer), 579

N

Neoplasms, ocular and orbital, production by intra-arterial inoculation of tumor cells from Walker carcinosarcoma 256 (Basu, Sibay, and Chang), 745
Nerves in human trabecular region, ultrastructure (Feeney), 462
Noncorneal electrodes, electroretinograms from (Tepas and Armington), 784
Noradrenalin, effects of intrauterine Adrenalin and, on fetal rat lens (Pitel and Lerman), 406

O

Ocular fluids and lens, transport of alpha aminoisobutyric acid into (Reddy and Kinsey), 41
malformations of chick embryo produced by photocoagulation (Jesberg), 348
media, transmission (Boettner and Wolter), 776
motility and pupillary dilatation in human beings during positive acceleration, limitation of (Duane, Beckman, and Coburn), 136

Ocular—Cont'd
and orbital neoplasms, production, by intra-arterial inoculation of tumor cells from Walker carcinosarcoma 256 (Basu, Sibay, and Chang), 745
tissues, normal, mast cells and amines in (Levene), 531
toxoplasmosis, antibody tests for (Maloney and Kaufman), 556
zinc concentration (Galin, Nano, and Hall), 142
Ogle, Kenneth N., presentation of Proctor Medal of Association for Research in Ophthalmology to (Rucker), 439
Ogle, Kenneth N., publications of, 440
Orbital and ocular neoplasms, production by intra-arterial inoculation of tumor cells from Walker carcinosarcoma 256 (Basu, Sibay, and Chang), 745
tissues of guinea pig, sulfation, in vitro (Haddad), 773
Osmolality of interstitial fluid in living rabbit cornea, microcryoscopic determination (Brubaker and Kupfer), 653
Outflow resistance, mode of action of pilocarpine on, in eye of primate (Circopithecus ethiops) (Bárány), 712
Oxygen concentration and pH, relationship of rat lens respiration to (Sippel), 385
consumption in rat lens, measurement with flow respirometer (Sippel), 377

P

P-32, in vitro incorporation of, and effect of diaminodiphenoxyalkane (Glocklin and Potts), 111
Parathyroid hormone, lenticular effects (Firschein), 788
Pathologic corneas, polysaccharides in normal and (Anseth and Laurent), 195
Pathways, metabolic, in experimental diabetic cataract (Lerman), 507
pH, oxygen concentration and, relationship of rat lens respiration to (Sippel), 385
Phenothiazines, concentration, in eye of experimental animals (Potts), 522
Phlyctenulosis: attempts to produce experimental model with BCG (Thygeson, Diaz-Bonnet, and Okumoto), 262
Photocoagulation, ocular malformations of chick embryo produced by (Jesberg), 348
Physical basis for transparency of crystalline lens (Trokel), 493
Physiology, comparative, of fish and mammals. Corneal hydration (Smelser), 11
Pigment cell epithelium, retinal, metabolism (Glocklin and Potts), 111
Pigments, visual. Absorption spectra of isolated single frog retinal rods and cones (Wolken), 327
Pilocarpine, mode of action, on outflow resistance in eye of primate (Cercopithecus ethiops) (Bárány), 712
Plasma levels, carbonic anhydrase inhibitors and, studies of effect (Constant), 609
Pollen, pine, induced uveitis in guinea pigs, effects of cortisone on (Coleman and Canaan), 751
Polysaccharides in normal and pathologic corneas (Anseth and Laurent), 195
Population study, Des Moines, of glaucoma (Armaly), 618
Posterior chamber of rabbit eye, transport of amino acids into (Kinsey and Reddy), 355
Potentials, blood-aqueous, alterations in rabbit (Miller), 59
Potts, Albert M. (Johnson), 283
Potts, Albert M., publications of, 285
Pressure cup technique for measurement of aqueous humor formation, evaluation (Langham), 484
intra-ocular, experimentally increased, in rabbit, histopathology (Kupfer), 474
steady-state, dynamics, accommodation and (Armaly and Jepson), 480
swelling, of corneal stroma (Dohlman, Hedbys, and Mishima), 158
and volume changes in living and dead rabbit eyes, relationship between (Eisenlohr and Langham), 63
Primate (Cercopithecus ethiops), outflow resistance in eye of, mode of action of pilocarpine on (Bárány), 712
Proctor Award Lecture: A consideration of horopter (Ogle), 446
Corneal hydration, comparative physiology of fish and mammals (Smelser), 11
Proctor Medal of the Association for Research in Ophthalmology, presentation to George K. Smelser (von Sallmann), 3
to Kenneth N. Ogle (Rucker), 439
Proctor Medal Award, remarks on acceptance (Ogle), 443; (Smelser), 8
Protein and carbohydrate metabolism in rat lens, effect of ionizing radiation on (Lerman, Devi, and Banerjee), 95
Proteins, chick lens, formation and distribution of (Langman and Maisel), 86
Publications of Albert M. Potts, 285
of E. Bárány, 708
of George K. Smelser, 5
of Kenneth N. Ogle, 440
Pupil size, effect on accommodation, convergence, and the AC/A ratio (Ripps et al.), 127
Pupillary dilatation, ocular motility and, in human beings during positive acceleration, limitation of (Duane, Beckman, and Coburn), 136

Purine and pyrimidine analogues on activation of corneal stromal cells to take up neutral red, effect of amino acid and (Weimar), 226

Q

Quantitative analysis of free amino acids and related compounds in growing rat lens (Reddy and Kinsey), 635

R

Rabbit, blood-aqueous potentials in, alterations (Miller), 59
cornea, living osmolality of interstitial fluid in, microcryoscopic determination (Brubaker and Kupfer), 653
and other tissues grown in vitro, karyologic studies on cells from (Sarkar, Basu, and Miller), 33
lens, rubidium-86 accumulated in, distribution of (Becker and Cotlier), 642
Radiation, ionizing, effect on protein and carbohydrate metabolism in rat lens (Lerman, Devi, and Banerjee), 95
Rat lens, growing, respiration and glutathione in (Sippel), 629
retina, repression of glutaminase I in, by administration of sodium-L-glutamate (Freedman and Potts), 118
Rate of aqueous flow with iodide, measurement of (Becker), 52
Reactions in cornea to equine albumin, evaluation (Sery, Pinkes, and Nagy), 672
Remarks on acceptance of Friedenwald Memorial Award (Bárány), 707; (Potts), 288
of Proctor Medal Award (Ogle), 443; (Smelser), 8
Repression of glutaminase I in rat retina by administration of sodium-L-glutamate (Freedman and Potts), 118
Resistance, outflow, mode of action of pilocarpine on, in eye of primate (Cercopithecus ethiops) (Bárány), 712
Resonant frequencies of rod and cone electroretinograms (Gouras and Gunkel), 122
Respiration and glutathione in growing rat lens (Sippel), 629
rat lens, relationship to oxygen concentration and pH (Sippel), 385
Respirometer, flow, measurement of oxygen consumption in rat lens with (Sippel), 377
Retina and choroid, relative absorption of thermal energy in (Geeraets et al.), 340
human, Müller's cells and "middle limiting membrane" of (Fine and Zimmerman), 304
Retina—Cont'd
rat, repression of glutaminase I in, by administration of sodium-L-glutamate (Freedman and Potts), 118
Retinal cells, bovine, continuous culture (Wolken and Ward), 693
pigment cell epithelium, metabolism of Glocklin and Potts), 111
rods and cones, isolated, single frog, absorption spectra of. Visual pigments (Wolken), 327
Retinoblastoma, study of two cases by electron microscopy (Allen, Latta, and Straatsma), 728
Retinotoxic and choroidotoxic substances (Potts), 290
Ribonucleic acid of lens, influence of age and cataract formation on (Dische, Zelmenis, and Larys), 101
Rings, immune corneal (Sery, Pinkes, and Nagy), 672
diffusion kinetics of equine albumin in rabbit cornea (Sery, Pinkes, and Nagy), 756
mechanism of local ring formation (Sery and Nagy), 762
Rod and cone electroretinograms, resonant frequencies of (Gouras and Gunkel), 122
Rods and cones, retinal, absorption spectra of isolated single frog. Visual pigments (Wolken), 327
Rubber, silicone, tendon for extraocular muscle (Bowen and Dyer), 579
Rubidium-86 accumulated in rabbit lens, distribution of (Becker and Cotlier), 642
accumulation by rabbit lens (Becker), 502

S

Segments, stromal, separated by interlamellar discs, corneal hydration studied in (Pollack), 661
Silicone rubber tendon for extraocular muscle (Bowen and Dyer), 579
Smelser, George K., presentation of Proctor Medal of the Association for Research in Ophthalmology to (von Sallmann), 3
Smelser, George K., publications of, 5
Sodium-L-glutamate, repression of glutaminase I in rat retina by administration of (Freedman and Potts), 118
Spatial differences in human ERG (Gouras, Gunkel, and Jones), 333
Staphylococcic keratitis, experimental (Hogan et al.), 267
Steady-state intraocular pressure, dynamics, accommodation and (Armaly and Jepson), 480

Stimulation, brain, extraocular muscle action from, in macaque (Jampel), 565
Stroma, corneal, swelling pressure of (Dohlman, Hedbys, and Mishima), 158
Stromal cells, corneal uptake of neutral red, effect of amino acid, purine, and pyrimidine analogues on activation of (Weimar), 226
segments separated by interlamellar discs, corneal hydration studied in (Pollack), 661
Structure, fine, of cornea, further observations on (Jakus), 202
of human ciliary muscle (Ishikawa), 587
Sulfation of orbital tissues of guinea pig, in vitro (Haddad), 773
Swelling pressure of corneal stroma (Dohlman, Hedbys, and Mishima), 158

T

Temperature gradients in rabbit eye (Schwartz and Feller), 513
Tendon, silicone rubber, for extraocular muscle (Bowen and Dyer), 579
Thermal energy in retina and choroid, relative absorption of (Geeraets et al.), 340
Tonometer, Mackay-Marg, evaluation of basic validity and clinical usefulness of (Moses, Marg, and Oechsli), 78
Toxoplasmosis, ocular, antibody tests for (Maloney and Kaufman), 556
Trabecular region, ultrastructure of nerves in (Feeney), 462
Transmission of ocular media (Boettner and Wolter), 776
Transparency, corneal, some aspects of interrelation between corneal hydration and (Potts), 163
of crystalline lens, physical basis (Trokel), 493
Transport of alpha aminoisobutyric acid into ocular fluids and lens (Reddy and Kinsey), 41
of amino acids into posterior chamber of rabbit eye (Kinsey and Reddy), 355
Triethylenethiophosphoramide, effects on carrageenin granuloma of guinea pig cornea (Burns and Beighle), 666
Tumor cells from Walker carcinosarcoma 256, intra-arterial inoculation, production of ocular and orbital neoplasms by (Basu, Sibay, and Chang), 745

U

Ultrastructure of malignant melanomas of choroid (Hogan and Feeney), 544
of nerves in human trabecular region (Feeney), 462
Uveitis, pine pollen–induced, in guinea pigs, effects of cortisone on (Coleman and Canaan), 751

V

Validity, basic, and clinical usefulness of Mackay-Marg tonometer, evaluation of (Moses, Marg, and Oechsli), 78
Vascularization, corneal (Cogan), 253
Visual pigments. Absorption spectra of isolated single frog retinal rods and cones (Wolken), 327
Volume changes in living and dead rabbit eyes, relationship between pressure and (Eisenlohr and Langham), 63

W

Walker carcinosarcoma 256, intra-arterial inoculation of tumor cells from, production of ocular and orbital neoplasms by (Basu, Sibay, and Chang), 745
Water, ions and, movement across cornea (Donn), 170

Z

Zinc concentration, ocular (Galin, Nano, and Hall), 142
